Portfolio

Ahmedabad, India

## EDUCATION

- IITRAM (Institute of Infrastructure Tech. Research & Management)** Ahmedabad, India  
*Bachelor of Technology in Computer Science; CGPA: 7.65/10* 2023 – 2027

## EXPERIENCE

- Infosys** Virtual Internship  
*AI & Machine Learning Intern* Dec 2025 – Feb 2026
  - Built an AI-driven **Face Authentication** system using **MediaPipe** with 468-point landmark detection, achieving **95%+ verification accuracy** across varied lighting conditions.
  - Optimized the real-time face-tracking pipeline and integrated **Speech-to-Text/Text-to-Speech** modules, reducing per-frame processing latency to under **50ms**.
- Zidio Development** Remote  
*Software Development Intern* May 2025 – June 2025
  - Built **ExcelFlow**, a full-stack MERN app for automated spreadsheet processing with **JWT** auth, **Multer** uploads, and **MongoDB**-backed multi-sheet storage, reducing manual reporting time by **60%**.
  - Implemented **5+ chart types** (scatter plots, heatmaps, summary stats) using **Chart.js/Three.js** with CSV/PDF export, tested via **Postman** across an agile sprint cycle.

## PROJECTS

- TeleMedicine Platform | MERN, WebRTC, Socket.io | GitHub** Hackathon Winner
  - Built a full-stack healthcare portal with real-time video consultations (**WebRTC**) and **Socket.io**-based live notifications for appointments and doctor availability.
  - Engineered a **MongoDB**-backed appointment-matching system with pending-status fallback, cutting booking time from ~10 minutes to under **30 seconds**.
  - Secured the backend with **JWT** authentication and role-based access control for patients, doctors, and admins.
- AI-Powered Smart Garbage Detection | YOLOv8, FastAPI, Flutter | GitHub** College Project
  - Trained a custom **YOLOv8** model achieving **88%+ mAP** on waste classification across multiple categories.
  - Reduced false-positive rate by **35%** using confidence thresholding and temporal smoothing; built a **FastAPI** backend serving inference in under **100ms**, integrated with a **Flutter** app and automated GPS-tagged alerts.
- P2P File Distribution System | Flutter, Kotlin, Bluetooth | GitHub** College Project
  - Built a fully offline, decentralized file-sharing app using multi-hop **Bluetooth** mesh networking across up to **6 nodes** simultaneously.
  - Reduced redundant transmissions by **40%** using TTL-based propagation control and file-ID deduplication.
- KisanMitra | Python, React, Machine Learning | GitHub** Smart India Hackathon
  - Built a soil-quality prediction system using **Random Forest** classification on **7 soil parameters**, recommending optimal crops with **82% accuracy**.
- VedaStack | Next.js, MongoDB, Mongoose | GitHub | Live** SaaS Product
  - Deployed an institutional SaaS platform for schools/hospitals handling subscription onboarding and lead generation, built with **Next.js API routes** and **MongoDB/Mongoose**, with automated email notifications via **Resend**.

## TECHNICAL SKILLS

**Languages:** JavaScript (ES6+), C++, Python, Dart, Kotlin, SQL

**Frontend / Mobile:** React, Next.js, Tailwind CSS, Flutter

**Backend / APIs:** Node.js, Express, FastAPI, WebRTC, Socket.io, REST APIs

**ML / CV:** YOLOv8, MediaPipe, OpenCV

**CS Fundamentals:** Data Structures, Algorithms, OOP **Databases & Tools:** MongoDB, Mongoose, SQL, JWT, Git, Postman

ACHIEVEMENTS & ACTIVITIES

---

- **Winner**, College Hackathon – TeleMedicine Platform 2024
- **Participant**, NASA Space Apps Challenge 2024
- **Participant**, Smart India Hackathon – KisanMitra 2024
- **Core Member**, Alumni Relations Team – IITRAM 2023 – Present
